DRY FEED SUPPLEMENT FOR SHEEP AND CATTLE

An 86% protein (30% urea) and phosphorus block for cattle and sheep grazing high volumes of dry pasture or stubble

APPLICATION:

Suitable for:

1. Breeding cattle
2. Replacement heifers
3. Growing cattle
4. Sheep

FEATURES & BENEFITS:

1. High urea content to increase intake of mature fibrous feed.
2. Contains balanced levels of phosphorus plus macro and trace minerals.
3. Hard formulation assists in regulating intakes.
4. Low risk and convenient method for supplementation of urea.

FEEDING DIRECTIONS:

Cattle:

Usual intake 50 – 200 g/head/day

Block Size	Cattle (per block)	Days (per block)	If consumption consistently exceeds 200 grams/head/day contact the customer service centre on 1300 666 657
20kg	15	7 – 14	
40kg	20	14 – 21	
100kg	50	14 – 21	

Sheep

Usual intake 15 – 60 g/head/day

Block Size	Sheep (per block)	Days (per block)	If consumption consistently exceeds 70 grams/head/day, contact the customer service centre on 1300 666 657
20kg	30	14 – 35	
40kg	30	28 – 56	
100kg	80	21 – 56	

1. Ensure a plentiful supply of dry pasture, or stubble, is available when feeding this product.
2. Place blocks on high, well-drained ground.
3. Locate blocks a minimum of 30 metres from watering points. Once stock are consuming the blocks, move them out further from watering points. This will aid in avoiding over consumption and encourage stock to graze out, utilising available paddock feed.

WARNINGS:

WARNING: This product is only suitable as a supplement for ruminants once the rumen is fully functioning. This product is not designed as a supplement for a pre-ruminant animal.

WARNING: This product contains urea, which can be toxic to livestock causing injury, death and consequent loss and damage to you and/or your business. Livestock management and environmental conditions

DRY FEED SUPPLEMENT FOR SHEEP AND CATTLE

(e.g. climate, farm management, pastures, soil types, water etc.) vary considerably between locations. These variations will affect individual supplementary requirements. For more information phone 1300 666 657.

Urea based products should only be fed as part of a complete supplementation program, as urea can cause death to stock which have not been gradually exposed to it, or if intakes are excessive. Excessive intakes may occur where prior supplementation has been inadequate.

Producers should note the following precautionary recommendations:

1. Consumption should not exceed the level indicated on this label.
2. Should consumption exceed the level stated on this label please call 1300 666 657.
3. Always provide adequate clean drinking water.
4. Urea should not be fed to starving stock, malnourished and/or thirsty stock.
5. Risk of urea toxicity increases the closer blocks are placed to water.
6. Do not feed this product where roughage is inadequate.

WARNING: This feed has been formulated specifically for animals as described on the package, or the label attached to the package, and must not be used for other species of animals. This product is unsuitable for human consumption. The manufacturer accepts no responsibility if this feed is used in quantities, conditions or in any way other than in accordance with the manufacturers recommendations. The manufacturer's recommendations for the use of this product may be obtained by contacting our Customer Service Centre or the Head Office of the company.

ANALYSIS (AS-FED)

Total Crude Protein and Equivalent Crude Protein (minimum)	86%	Fluorine (maximum)	0.1%
Crude Protein (minimum)	NIL	Sulphur (minimum)	1.4%
Equivalent Crude Protein (minimum)	86%	Magnesium (minimum)	3.5%
Urea	30%	Copper (added)	300 mg/kg
Crude Fat (minimum)	0%	Cobalt (added)	30 mg/kg
Crude Fibre (maximum)	10%	Iodine (added)	30 mg/kg
Salt (maximum added)	30%	Zinc (added)	500 mg/kg
Calcium (minimum)	7.0%	Selenium (added)	2.5 mg/kg
